

FOLLOW OUR GOOD NAME!

Welcome to the SCC GmbH team: We are one of Europe's biggest consultancy companies in the regulation sphere, a respected partner of the chemical industry, and, for more than 140 experts from different countries, a professional home. Our passion: managing registration and approval procedures for chemicals such as agrochemicals, biocides, etc. Our goal: to grow even further. In an international client environment. In the personal, open working culture of a family business that is focused on caring for its team. Located at the heart of the Rhine-Nahe region, alongside nature, but also right next to the vibrant Rhine-Main area. Expand our scientific expertise as

MICROBIOLOGIST (M/F/D) - REGULATORY AFFAIRS

BAD KREUZNACH

WHAT YOU CAN EXPECT

- Your path is taking you into a team of currently 25 people – and right into our enormous diversity of projects
- Your task: assessment of efficacy of various substances and products mainly in the field of biocides and managing projects in the field of registration under the BPR and other biocidal regulations
- Your mission: in collaboration with your colleagues, you will prepare efficacy assessments, plan/coordinate efficacy studies and engage in various regulatory projects
- Your focus: to obtain approvals/authorisations for our client's active substances/biocidal products in the European market

WHAT YOU OFFER

- Science degree in natural sciences (microbiology or related scientific disciplines)
- At least 5 years' experience in efficacy of biocide products and in dealing with regulation of biocides
- Ability to tackle and coordinate complex issues effectively
- Confident using current office programs. Experience with regulatory software tools such as IUCLID, R4BP3 and/or the SPC-Editor is of advantage
- A talent for organisation, goal orientation and awareness of deadlines is a must
- Strong communication and presentation skills in German and English

WHAT WE OFFER

- Exciting project work with opportunities for personal development
- Intensive on-the-job training and flexible working hours
- An attractive salary with profit-sharing, bonuses and benefits (company pension plan, food allowance, etc.)
- A very good working atmosphere in a team supported by corporate events and socialising outside of work (not currently because of the Corona Pandemic)

Do you thrive on challenging projects in an interdisciplinary team of ambitious professionals? Then apply online via the link below!
